

## SPECIALITY FERTILISERS

LIQUID

ECO-FRIENDLY

# SoftaSoil™

Soil Conditioner; aids in leaching Sodium, increasing soil aeration & reducing soil compaction

SoftaSoil™ is a specially formulated multifunctional soil conditioner and penetrator containing Ammonium Laureth Sulfate and amino acids. This helps increase water penetration by allowing water to better adhere to soil particles that may have become locked together through compaction, hydrophobic or poor soil structure.

### The SoftaSoil™ Advantage

- The amino acids in the formulation also help increase microbial activity in the soil, leading to increased aeration and greater friability and workability of soils.
- Problem and/or common compaction areas in lawns, greens, fairways, turf, sports fields, greenhouse growing medias and over-worked soils, can be greatly improved using SoftaSoil™.
- It is also recommended for use in crops grown in plastic covered beds to reduce lateral movement of water.

### Guaranteed Analysis

Ammonium Laureth Sulfate	15%
Amino Acids	5%

### Benefits

- SoftaSoil™ helps unlock compacted particles, thereby increasing water adherence and water use efficiency and penetration in soil profile
- Increases aeration and improves drainage
- Promotes root development and deeper root systems
- Aids in leaching of sodium out of the soil profiles
- Improves overall soil and soil-water health and therefore crop performance
- Increases efficiency of water use and reduces water runoff
- Increases fertiliser/input effectiveness
- Stimulates microbial activity in the soil

Available Pack Sizes

1 L | 18.92 L | 1000 L

Application Guidelines

PRE-PLANT APPLICATION		EXISTING CROP APPLICATION	
TIMING	RATE	TIMING	RATE
Apply before planting when wetting up soil Repeat 4 weeks later as needed	5L/ha 5L/ha	Apply early Spring Repeat 3-4 times during the growing season or as needed	5L/ha 5L/ha

For more information on application rates and timing relevant to your crop or circumstances please contact your local distributor or visit [www.zadco.com.au](http://www.zadco.com.au)

**Disclaimer:** Any rates of application and timing may vary and are subject to change according to crop variety, crop demand for nutrient/s, seasonal variations, and crop circumstance. Technical advice is provided to growers on the basis that the information supplied by the grower or agent is correct and that any technical support obtained from third parties (e.g. soil and leaf analysis results) is also correct at the time of preparation of the report. Zadco does not accept any liability whatsoever and howsoever arising from the use of the technical advice and the products used, should the information supplied to Zadco be incorrect or inaccurate. For warranty details, please refer to JH Biotech's warranty on the product label.

Compatibility

- Always run a compatibility test before applying with other chemicals
- Softasoil™ is COMPATIBLE with most fungicides, insecticides and herbicides

Product Storage and Handling

- Softasoil™ is stable under normal storage conditions. Avoid overheating or freezing, exposure to moisture, heat and sunlight. Store in a cool, dry place
- Dispose of product/container in accordance with federal, state and local regulations

Plant and Environmental Safety

- Harmless to plants and is non-phytotoxic when applied according to label directives
- Harmless to wildlife and is environmentally friendly
