

FERTILE®

Totally Soluble, Complete Fertiliser

10-10-23 (2% Mg + TE)

20
KILOGRAMS

Product Information

GENERAL INFORMATION

Balanced nutrition is an important aspect of crop production. Nutrition needs to be allocated the same level of importance as any other aspect of crop production for profitability and viability in such competitive and quality driven horticultural industries.

FERTILE® was especially formulated for a dual purpose. The high quality products used in the manufacture of **FERTILE®** deem it pure and suitable for fertigation as well as foliar application.

FERTILE® is ideal for all crops. It is especially of benefit early in the season due to its high Phosphorous content, helping crops make it through a cool early spring period.

FERTILE® is 100 percent pure and soluble. It dissolves instantly in water and it adapts to your established spray program and can be applied at the same time as other chemicals.

GUARANTEED ANALYSIS

Nitrogen	10%
Phosphorous	10%
Potassium	23%
Magnesium	2%
Sulphur	4%

+ all Trace elements in Biomin form including Molybdenum

KEEP OUT OF REACH OF CHILDREN

COMPATIBILITY: **FERTILE®** is compatible with almost all fungicides, fertilisers and insecticides. It is NOT compatible with Calcium based products nor Copper based products. Always run a jar test prior to application to verify compatibility.

Directions and General Recommendations

SOIL APPLICATION

Apply **FERTILE®** at 15 – 40 Kilograms per hectare per application. Repeat as needed.

FOLIAR APPLICATION

Apply **FERTILE®** at 3 – 10 grams / 1L of water and spray on to the foliage of the plants. Repeat as needed.

FERTILE® is best applied when plants are in an active growing stage. **FERTILE® may be used at any time throughout the season.** For best results and more specific recommendations, contact your nearest distributor.

ADVANTAGES & BENEFITS

FERTILE® is specially formulated to give young and established crops a strong headstart. It is ideal for use in all fertigation systems.

FERTILE® is ideal for use on older crops if they lack vigor, flowering, and fruit set.

FERTILE® is ideal for post harvest applications to build enough nutrient reserves for next years crop.

FERTILE® has high amounts of soluble P and K which makes it ideal if used in periods of stress (cold and hot weather).

LIMITED WARRANTY

Manufacturer or reseller makes no warranty, whether expressed or implied, concerning the use of this product other than for the purposes indicated on the label. Neither manufacturer nor reseller shall be liable for any injury or damage caused by this product due to misuse, mishandling or any application not specifically described on the label.

EASE OF APPLICATION

FERTILE® is ideal for application by underground sprinkler systems, injectors, pumps, power sprayers, proportioners, irrigation systems and most other application equipment. It adapts to any established program.

ADAPTABLE TO FOLIAR FEEDING

All **FERTILE®** formulations can be base-fed or foliar-fed to your crop, with maximum effectiveness. Our specially chelated micronutrients are quickly, and safely absorbed through both the roots and the foliage.

LOW SALT INDEX

All formulations of **FERTILE®** are made without the use of chlorides nor products high in sodium, therefore they are made from high quality ingredients.

COST EFFECTIVE AND VERSATILE

FERTILE® can also be used as a foliar application supplying the crops with all macro and micro nutrients with every application, promoting balanced nutrition making the product extremely cost effective.

FERTILE® aids in preventing plant and fruit susceptibility to disease by increasing the overall health and mineral balance of the crop.
