

HUMIC 80[®] ULTRA

Product Information

About HUMIC 80[®] ULTRA

Humic80[®] Ultra is a combination of **Humic80[®] Powder** and **BioSize Plus (Kelp)** in an all in one formulation designed specifically for extra root stimulation and healthy plant growth.

Humic80[®] Ultra can be applied as part of regular nutrient applications or in conjunction with a biological soil health program.

The **Humic80[®] Ultra** component serves as an excellent chelator of minerals which will help increase nutrient uptake and aid in the reduction of leaching of nutrients through the soil profile. The **BioSize Plus** component when used in the soil will aid and improve root growth. This premium all in one offers better root growth, better root hair density, increased root depth and root mass as well as improves drought tolerance by increasing the water retention in the soil.
