

# MEGA STARTER (High P)

High Phosphorus Liquid Fertiliser

## Product Information

### About Mega Starter (High P)

**Mega Starter** (High P) was specially designed to deliver available NPK in highly plant available forms.

Most crops need high amounts of Phosphorus in the early stages of crop growth for optimum root development and establishment. **Mega Starter** (High P) delivers a high amount of available Phosphorus to the root zone to increase root initiation, root development as well as stimulate overall plant growth.

**Mega Starter** (High P) contains a propriety blend of humic acid which has a high Carbon to Oxygen ratio and contributes to placing much needed active Carbon and Oxygen around the root zone, root growth and development, as well as facilitating nutrient uptake of soil-applied fertilisers to improve overall fertiliser efficiency.

**Mega Starter** (High P) also delivers the power of plant biostimulants which trigger root initiation, increased fruit set and improved germination of seedlings and seeded crops when used early in the season.

**Mega Starter** (High P) reduces transplant shock.

### Guaranteed Analysis

	% w/v
Nitrogen (N)	10%
Phosphorus (P)	19%
Potassium (K)	4%

*Also contains humic acid, chelated Zinc, Iron, Manganese and plant biostimulants.*

**KEEP OUT OF REACH OF CHILDREN**

### Net Contents

☐ 18.92 Litres ☐ 1000 Litres

Manufactured by: JH BIOTECH, INC.  
PO Box 3538, Ventura, CA 93006, USA

## Directions and General Recommendations

### Soil Application (all crops)

**FERTIGATION, SPRINKLER AND DRIPPER APPLICATION:**  
Apply 5 - 10L / Ha.

**IN-FURROW APPLICATION AT PLANTING / SEEDING:**  
Apply 1 - 1.5 L per 100L of water.

**WATER WHEEL:**  
Apply 1 - 2L per 100L of water with transplants.

Repeat the application of **Mega Starter** (High P) every month throughout the growing season, especially at periods of high stress and high nutrient demand.

### Foliar Application (all crops)

Apply 5 - 6 L / Ha early in the season (cold or wet weather).

Repeat applications monthly or as needed for a high dose of plant available Phosphorus.

### Limited Warranty

Manufacturer or reseller makes no warranty, whether expressed or implied, concerning the use of this product other than for the purposes indicated on the label. Neither manufacturer nor reseller shall be liable for any injury or damage caused by this product due to misuse, mishandling or any application not specifically described on the label.

### SEEDLING DIP:

Apply 1L per 100L of water as a seedling drench or as a foliar application 2 - 7 days before planting. Repeat at planting or 1 week after planting.

### WATER RATIO:

A dilution of 1 : 100 means 1 part product : 100 parts water.

Use **Mega Starter** (High P) at a minimum dilution of 1 : 100.

**Mega Starter** (High P) may be used at any time throughout the season. For best result and more specific recommendations, contact your nearest distributor.

### Compatibility

**ALWAYS** perform a compatibility test (jar test) before mixing anything with **Mega Starter** (High P).

**COMPATIBILITY:** **Mega Starter** (High P) is **INCOMPATIBLE** with Trace elements, Magnesium, and Calcium foliar nutrients.

Do NOT mix with very acidic nor very alkaline products.
