

MIXWELL™

Product Information

GENERAL INFORMATION

MixWell is a multifunction spray tank and / or irrigation water additive designed for use where the pH needs to be lowered into a more acidic range. **MixWell** will help buffer spray tank solutions to make fertiliser tank mixes more compatible. It is natural and environmentally friendly. **MixWell** is ideal for conditioning alkaline soils and water. **MixWell** can help prevent hydrolysis and keep pH in an ideal range.

MixWell is an acidic material with a pH of 2.0. Adding **MixWell** to the spray tank or irrigation water will lower alkaline pH water into a more desirable range. By applying **MixWell** with a routine soil or turf program, calcareous / alkaline soils can be lowered to a more desirable range.

Calcium, iron, zinc and other nutrients often form precipitates with phosphorus under alkaline conditions. These precipitates collect in the bottom of mixing and spray tanks and can eventually clog lines and nozzles. **MixWell** can lower the pH of the mixing water and prevent these precipitates from forming.

MixWell can dissolve these solids (precipitates) and get them back into solution for easy clean-up. **MixWell** also makes an excellent equipment cleaner for routine maintenance of irrigation and spray lines. **MixWell** is allowed as a drip line cleaner, equipment cleaner and for pH adjustment.

MIXWELL can be applied to ALL crops including all vegetables, Potatoes, Carrots, Onions, all berries and strawberries, all Brassicas, all fruit trees, Avocados, Persimmons, Citrus, all Nut trees, Vineyards, Kiwifruit, Tropical fruit, Lettuce, Asparagus, all Melons, Beans, Ginger, Ornamentals, Cut flowers and Pastures.

GUARANTEED ANALYSIS

B-Hydroxycarboxylic acid	45.0%
Hydroxysuccinic acid	5.0%
Inert Ingredients: L-Ascorbic acid, Vinegar, Water	

KEEP OUT OF REACH OF CHILDREN

COMPATIBILITY: Always perform a compatibility test before mixing anything with **MIXWELL**®.

CAUTION: DO NOT mix **MIXWELL**® with Copper.

Always check pH of water before adding **MIXWELL**®.

Directions and General Recommendations

SOIL APPLICATION

Apply **MIXWELL**® at 4 – 5 Litres per hectare through drip irrigation before flowering. Repeat as needed after flowering throughout the season.

FOLIAR APPLICATION

Apply **MIXWELL**® at 1 ml/ 1L of water and spray on to the foliage of the plants. Repeat as needed. The rate depends on the initial pH and quality of the water.

ALL FIELD CROPS (grain crops, flowers, pastures, etc...): Apply 1 Litre per hectare of **MIXWELL**® at any stage in the season. **MIXWELL**® can be applied with almost all farm chemicals and fertilisers.

ALL VEGETABLE CROPS: Apply 1 Litre per hectare of **MIXWELL**® at any stage in the season. **MIXWELL**® can be applied with almost all farm chemicals and fertilisers.

POTATOES & CARROTS: Apply 1 Litre per hectare of **MIXWELL**® at any stage in the season. **MIXWELL**® can be applied with almost all farm chemicals and fertilisers.

GREENHOUSE CROPS: Apply 1 Litre per hectare of **MIXWELL**® at any stage in the season. **MIXWELL**® can be applied with almost all farm chemicals and fertilisers.

MIXWELL® can be applied to Hydroponic tanks at a rate of 1L / 1000L in tank A and 1L / 1000L in tank B. Check pH of water before applying **MIXWELL**®.

LIMITED WARRANTY

Manufacturer or reseller makes no warranty, whether expressed or implied, concerning the use of this product other than for the purposes indicated on the label. Neither manufacturer nor reseller shall be liable for any injury or damage caused by this product due to misuse, mishandling or any application not specifically described on the label.

APPLES, POME & STONE FRUIT: Apply 1 Litre per hectare of **MIXWELL**® at any stage in the season. **MIXWELL**® can be applied with almost all farm chemicals and fertilisers.

FRUIT TREES & AVOCADOS: Apply 1 Litre per hectare of **MIXWELL**® at any stage in the season. **MIXWELL**® can be applied with almost all farm chemicals and fertilisers.

KIWIFRUIT: Apply 1 Litre per hectare of **MIXWELL**® at any stage in the season. **MIXWELL**® can be applied with almost all farm chemicals and fertilisers.

TABLEGRAPES: Apply 1 Litre per hectare of **MIXWELL**® at any stage in the season. **MIXWELL**® can be applied with almost all farm chemicals and fertilisers.

WINEGRAPES: Apply 1 Litre per hectare of **MIXWELL**® at any stage in the season. **MIXWELL**® can be applied with almost all farm chemicals and fertilisers.

MIXWELL® can be used with fertilisers including Calcium, biological materials, hormones and non selective herbicides.

MIXWELL® is best applied when plants are in an active growing stage. **MIXWELL**® may be used at any time throughout the season. For best results and more specific recommendations, contact your nearest distributor.
